Engraved Badges

The "traditional" Hospitality Industry deluxe engraved badge

Logos are screen printed onto the badge, sizes are usually customised to meet organisation needs.

The badge is engraved and then 3D resin doming resin applied to give that luxurious shiny lens look..

The versatile engraved badge

Cut to size and finished to order providing a very cost effective name badge and door or desk plate.

Badges are lightweight and available in a wide range of foreground and background colours

PatriTech Badges

The PatriTech style of badge is our most popular choice of name badge.

It is functional and light weight as well as being resilient.

The two most popular sizes are 76 x 25 mm and 64 x 19 mm but a number of other standard sizes are available.

Alloy plates are digitally printed so providing for unlimited colours and the full range of computer fonts.

The most popular plates used are Brushed Gold, Brushed Silver and bright White but other colours can be made available including polished stainless steel and light grey.

The PatriTech badge is also available in a borderless format where the backing is flush with the edges of the badge.

Although the same range of sizes are available in the borderless style with this format we can produce any custom size to meet your requirements.

All styles of attachments, Pins, Clips and Magnets etc., can be used with the PatriTech badge.

PearlTech Badges

To the best of our knowledge the PearlTech badge is exclusive to Patrice Products

The badges are actually real Photographs produced from our unique process and printed on proper photographic paper.

Although we can produce the PearlTech badge in custom sizes we tend to focus on the same popular sizes used in the PatriTech range so as to maintain cost effective pricing.

All PearlTech badges are 3D Resin Domed to protect the surface of the badge.

Full Metal Badges

As Patrice are also metal badge manufacturers we can supply full metal name badges.

We have some standard sizes where we engrave the names onto the badge and then either Gold or Silver plate them, adding colour infill and 3D doming as required.

Badges can be produced with custom logos using one of a variety of processes .

Brooch Pins and Tie Tacks are the most popular means of attachment but magnets and Pin/Clips can be used.
